

# Compost turner

# CMC SF 200

Compost  
Systems

The **CMC SF 200** is a self propelled electric drive turning machine ideally suited for small plants. It has proven to be an excellent machine with an ideal mixing ability, simple handling by a manual control unit. Space requirements are kept to a minimum and

the electric drives on the steel chain drive and on the rotor drive are low-noise. To be independent of electricity supply it is also possible to use a power generator. **The CMC SF 200 corresponds to the strict criteria of Controlled Microbial Composting.**

## Technical data

|                     |                             |
|---------------------|-----------------------------|
| Maximum width:      | 2.20 m                      |
| Maximum height:     | 1.00 m                      |
| Rotor length:       | 2.00 m                      |
| Machine dimensions: | 2.67 m x 1.10 m x 1.43 m    |
| Transport weight:   | ~ 500 kg                    |
| Chassis:            | Steel track chain           |
| Driving system:     | Electric                    |
| Rotor:              | 2 pc 4 kW electric motor    |
| Chassis:            | 2 pc 0.5 kW electric motor  |
| Color:              | Grey / Blue                 |
| Turning quantity:   | up to 300 m <sup>3</sup> /h |
| Working speed:      | 200 m/h                     |

### Options:

Power Generator  
Inoculation system  
Irrigation boom including nozzles  
Special colour  
Further equipment on request!
